Export Control Add-On Package

Export Control & Shipment Compliance Shipping Solution

This add-on package can be added to our customizable solutions, eShipEnterprise and eShipLab, to help ensure that your shipments are properly prepared in accordance with the most current government regulations.

The importance:

- » Shipments that are not compliant with government regulations can get stuck at customs, costing you more time and money.
- » There are laws and regulations specifically for export. Export violations have hefty fines and can also include both criminal and civil penalties.

Add-on to:

eShipEnterprise:

- » A customizable business shipping solution for domestic and international shipping of small parcel

Export Control Features:

- » Checks for embargoed countries and ECCN numbers
- » Provides accurate classification of materials
- » Screens shipments for ITAR, EAR and all applicable restricted party lists
- » Supports export licensing determination
- » Automated Export System (AES) filing

eShipLab:

- » A customizable hazardous material and dangerous goods shipping solution that is compliant with government regulations (IATA & DOT)
